

CSE2100: Data Structures and Introduction to Algorithms

Spring 2013

Lecture: TuTh 11am-12:15pm, Laurel Hall 202

Instructor: Ion Mandoiu

Office: ITE 261

Phone: 486-3784

E-mail: ion@engr.uconn.edu

Office hours: TuTh 12:30pm-1:30pm, Wed. 12pm-1pm

Teaching Assistant: Levon Nazaryan

Office: ITE 140

E-mail: levon.nazaryan@uconn.edu

Office hours: Mon. ~~11am-1pm~~ 12pm-1pm, Wed. ~~11am-12pm~~ 11am-1pm

Textbook: Michael T. Goodrich and Roberto Tamassia, *Data Structures and Algorithms in Java, 5th edition*, John Wiley and Sons, 2010.

Prerequisites: CSE 1102 Object Oriented Design and Programming.

Catalog description: Fundamental concepts of data structures and the algorithms that proceed from them. Implementation and use of linked lists, stacks, queues, trees, priority queues, heaps and graphs. Emphasis on recursion, abstract data types, object oriented design, and associated algorithms and complexity issues. Design using specifications and requirements. Basic computer organizations, including memory organizations and allocations issues. Programming assignments.

List of topics:

- Basics of algorithm analysis
- Arrays and linked lists
- Recursion
- Stacks and queues
- Lists and iterators
- Trees
- Priority queues
- Maps and dictionaries
- Search trees
- Text processing
- Graphs
- Memory management

Grade breakdown: Grading will be based on in-class quizzes (10%), homework assignments (20%), programming projects (20%), mid-term (25%) and final exam (25%).

Assignment submission: Homework assignments must be submitted electronically via WebCT Vista. Programming assignments must be submitted electronically via the Mooshak system at <http://dna.engr.uconn.edu/cse2100/>. Upon submission, Mooshak will automatically compile and execute your program against pre-determined test datasets and will provide you detailed feedback on the correctness and efficiency of your submission. This allows you to fix potential problems before the due date.

Late policy: Late submissions are allowed for up to three days after the original submission deadline, with 10% of the grade subtracted for each late day.

HuskyCT & Piazza: We have a HuskyCT site for the class; you can access it by logging in with your NetID and password at <https://learn.uconn.edu>. Please check this site regularly for class materials, grades, assignment clarifications, changes in class schedule, and other class announcements. For class discussions we will be using Piazza. Rather than emailing questions to the instructors you are encouraged to post them on Piazza at <https://piazza.com/uconn/spring2013/cse2100/home>. The system is highly catered to getting you help fast and efficiently from both instructors and classmates.

Academic honesty: You are expected to adhere to the highest standards of academic honesty. All submitted solutions must be your own work. For homework assignments and programming projects you may discuss ideas and concepts with others, but *must not share written solutions or code*. Use of published materials is allowed, but the sources should be explicitly stated in your solutions. Violations will be reviewed and sanctioned according to the University Policy on Academic Integrity.

Students with disabilities: If you have a documented disability for which you are or may be requesting an accommodation, you are encouraged to contact the instructor and the Center for Students with Disabilities or the University Program for College Students with Learning Disabilities as soon as possible to better ensure that such accommodations are implemented in a timely fashion.
