Project Requirements and Deadlines:

April 2, 2007	**Progress report** A brief 2-3 page written progress report will be due on April 4. This report should summarize how the project is progressing, the method/procedure, describe any unexpected difficulties encountered, and outline any major changes in the project plan.
April 4, 2007	**Oral presentation** ITE 330 has been reserved for oral presentations for Wednesday April 4. Presentations will be for 15-20 minutes per project.
April 26, 2007	**Written report** You are required to submit a formal term report due by April 26. This report will be a major factor in determining project grades. The report should be of professional quality and be in the format of a technical report. It should include detailed material such as program listings, sample runs, etc. placed in appendices. All reports must contain the following: • Title page • Abstract (summary of report) • Introduction (problem definition, background material, prior work, goals and methods) • Project results in one or more sections • Conclusions (evaluation of results, suggestions for improvement or future work) • References • Appendices (if appropriate)
April 27, 2007	**Project presentation** You can use any machines in CADT lab to present your project. You must show your individual contribution. I will be asking questions about the methods, results, etc. So, be prepared.
